

T-77

Bio-Fungicide against wound infecting pathogens

Key benefits

- Long-term protection from pathogens
- High compatibility
- No phytotoxic effects

Easy to use
in IPM

Safe for producer,
consumer and
the environment

No residues, no
WHP and min. REI

Product Facts

Target pests

Wound infecting pathogens such as *Botrytis*, *Sclerotinia* and *Eutypa*

Active ingredient

Trichoderma atroviride strain 77B

Formulation type

Wettable powder (WP)

Concentration

2×10^9 CFU/g

Standard dosage

250 - 500 g/ha

Crops

Wide range of crops

Andermatt

Efficient control of Botrytis on grapes with T-77®

Trial conducted by Agricultural Science Consultants, South Africa, 2014

- 3 applications of 250 g/ha and 500 g/ha
- First interval 14 days, second interval 60 days
- Apply as full cover spray or directed spray on plant wounds or susceptible plant parts
- Ensure good coverage of the target area

Andermatt Group is a global leader in biological solutions

- Strict quality control for consistent high quality
